EDUCATION

Chandigarh University

Bachelor of Engineering in Computer Science and Engineering

2027

CGPA: 7.57

H.D. Sr. Sec. School, Salhawas

Class XII

2023

82%

WORK EXPERIENCE

Technical Trainer – Data Structures and Algorithms

Aug 2026 – Nov 2026

Chandigarh University

- Teach Data Structures and Algorithms to junior students, covering arrays, strings, linked lists, stacks, queues, trees, graphs, sorting, searching, recursion, greedy algorithms, and dynamic programming.
- Guide students in developing efficient problem-solving approaches and analyzing algorithmic time and space complexity.
- Conduct technical sessions focused on coding, debugging, algorithm optimization, and Object-Oriented Programming concepts.

LLM Trainer

Dec 2024 – Mar 2025

Outlier AI

- Trained and evaluated Large Language Models by reviewing AI-generated responses for correctness, reasoning, factual accuracy, and adherence to coding requirements.
- Wrote high-quality prompts, ranked model outputs, and provided detailed technical feedback to improve model performance.
- Worked with coding and reasoning tasks while following strict quality and evaluation guidelines.

ACADEMIC PROJECTS

Agentic AI Customer Support Agent

2026–Present

- Built an autonomous customer support agent using LangGraph, Retrieval-Augmented Generation (RAG), and Qdrant vector database.
- Implemented retrieval-augmented generation with document ingestion and semantic search for efficient information retrieval.
- Designed multi-step agent workflows with tool calling, conversation memory, and modular processing components.

SunPhotonics O&M Platform

2025–2026

- Built a SaaS platform for solar EPC/O&M companies using Spring Boot, Next.js, and Supabase.
- Developed 30+ REST APIs for plant monitoring, PR/CUF analytics, ticketing, reporting, and backend business logic.
- Integrated dashboards for engineers, managers, and clients to support operational monitoring and reporting.

SolarIQ – Solar ROI Calculator

2024

- Developed a full-stack application to estimate solar ROI, subsidy benefits, and payback period.
- Built REST APIs and business logic using Spring Boot for calculations and data processing workflows.

SKILLS AND COURSEWORK

Programming Languages: Java, Python, SQL

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Complexity Analysis, System Design

Backend: Spring Boot, REST APIs, JWT, Microservices

AI/ML: Agentic AI, Retrieval-Augmented Generation (RAG), LangGraph, Qdrant

Databases: MySQL, PostgreSQL, Supabase

Tools: Git, GitHub, Postman, Docker

ACHIEVEMENTS

- Solved **400+ Data Structures and Algorithms problems**, demonstrating strong algorithmic problem-solving skills.
- Secured **TCS Prime** offer through campus recruitment.
- Earned **NPTEL Silver Certificate in Cloud Computing**.
- **Finalist – Zinnovatio 3.0 Hackathon**.

HOBBIES

•Cricket • Competitive Programming • Travelling
